SACRAMENTO— California's population grew in 2005 by 444,000 residents – a 1.2-percent growth rate – to total nearly 37.2 million persons as of January 1, 2006, according to new population estimates released today by the state Department of Finance.

The new report shows preliminary January 2006 population data, as well as revised January 2005 data, for the state, cities, and counties. Highlights include:

California Cities:

- The 2006 report lists 478 California cities, of which 357 gained population, eight experienced no change, and the remaining 113 lost population. Compared to Finance's previous two reports, more cities lost population and fewer cities gained population, reflecting the slowdown in the state's population growth.
- The city of Lincoln in Placer County experienced the state's fastest growth rate at 22.6 percent. Lincoln gained 2,927 housing units primarily from new construction, and now has a total population of 33,589.
- Other fast-growing cities grew because of substantial numbers of new housing units and some cities annexed existing housing units as well. These include Beaumont in Riverside County (21.1 percent), Patterson in Stanislaus County (19.0 percent), Greenfield in Monterey County (15.6 percent), Temecula and Coachella in Riverside County (14.7 and 13.7 percent respectively), and Lathrop in San Joaquin County (13.5 percent). Beaumont, Patterson, Temecula, and Lathrop also annexed existing housing units.
- California's largest city—Los Angeles – had the largest numeric increase of 41,357. Los Angeles added 12,680 housing units and has a total population of 3,976,071.
- Other large numeric increases include Bakersfield in Kern County (13,979), San Jose in Santa Clara County (12,563), Temecula in Riverside County (12,002), San Diego in San Diego County (10,819), and Irvine in Orange County (10,328).
- Over the last six years since the April 1, 2000 census, the top four fastest growing cities were Lincoln in Placer County (199.8 percent), Murrieta and Beaumont in Riverside County (109.9 and 103.3 percent respectively), and Brentwood in Contra Costa County (96.9 percent).
- Bakersfield in Kern County passed 300,000 in population, giving California 11 cities that exceed 300,000 in population.

- MORE -

California Counties:

- California's fifty-eight counties range in population from 1,241 in Alpine (east of Sacramento on the Nevada border) to over 10.2 million in Los Angeles.
- Compared to the state, twenty-one counties grew more rapidly, thirty-four grew more slowly, and three counties (Alpine, Inyo, and Sierra) experienced minor population decreases.
- The ranking of the state's ten most populated counties is the same since January 2004: Los Angeles, Orange, San Diego, San Bernardino, Riverside, Santa Clara, Alameda, Sacramento, Contra Costa, and Fresno. All but Fresno have over one million residents, Orange and San Diego have over three million each, and Los Angeles County is home to over 10 million people.
- Los Angeles County, the most populous county in the nation, accounts for over twenty-seven percent of the state's population. Only seven states have more population than Los Angeles County. It is over three times larger than California's second ranked county, Orange. Almost half of the state's population resides in four counties: Los Angeles, Orange, San Diego, and San Bernardino.
- Most of the ten counties attracting the largest number of new residents in 2005 were also among the top ten in total population. In the Bay Area, Alameda and Contra Costa counties, ranked 7th and 9th respectively in total population, were not among the state's fastest growers – even though each county added over 10,000 new residents. In the Central Valley, Kern and San Joaquin counties placed in the top ten category for the number of people gained during the year.
- Yuba, Riverside, and Imperial counties each grew by three percent or more during 2005. Kern, Placer, Madera, Colusa, Sutter, Merced, Tulare, and San Bernardino counties had growth rates above two percent.

The annual population change estimates are used by cities, counties, and special districts as a factor in the calculation of their annual appropriations limit. Cities and counties may also have the latest population numbers certified to the State Controller Office for use in the distribution of subvention funds. Other uses include the distribution of transportation funds, the allocation of liquor licenses, and by various state agencies for evaluation and planning.

Changes to the housing stock are used to prepare the annual city population estimates presented in this report. Estimated occupancy of housing units and the number of persons per household further determine population levels. Changes in city housing stocks result from new construction, demolitions, housing unit conversions, and annexations.

A variety of summary administrative records is used to produce the state and county population estimates. Birth and death counts, driver's license address changes, total housing units, school enrollment, federal income tax returns, legal immigration data, Medicare, Medi-Cal, and other data are provided by the responsible federal or state agency. Data are reported in summarized data tables that do not disclose any information about individuals.

Related population estimates reports are available on the Department's website: <http://www.dof.ca.gov/> under Demographic Information.
